

The graphs of $\sin x$, $\cos x$ and $\tan x$

Sine

- The maximum value of $\sin x$ is 1. At $x = 90^\circ$, $\sin x = 1$.
- The minimum value of $\sin x$ is -1 . At $x = 270^\circ$, $\sin x = -1$.
- The graph of $\sin x$ crosses the x-axis three times in the interval $0^\circ \leq x \leq 360^\circ$. At $x = 0^\circ$, 180° , and 360° , $\sin x = 0$.
- The graph of $\sin x$ is the same shape as the graph of $\cos x$, but it is shifted 270° to the left or 90° to the right.

Cosine

- The maximum value of $\cos x$ is 1. At $x = 0^\circ$ and $x = 360^\circ$, $\cos x = 1$.
- The minimum value of $\cos x$ is -1 . At $x = 180^\circ$, $\cos x = -1$.
- The graph of $\cos x$ crosses the x -axis twice in the interval $0^\circ \leq x \leq 360^\circ$. At $x = 90^\circ$ and $x = 270^\circ$, $\cos x = 0$.
- The graph of $\cos x$ is the same shape as the graph of $\sin x$, but it is shifted 90° to the left or 270° to the right.

Tangent

- The maximum value of $\tan x$ is ∞ .
- The minimum value of $\tan x$ is $-\infty$.
- The value of $\tan x$ is undefined at $x = 90^\circ$ and $x = 270^\circ$.
- The graph of $\tan x$ crosses the x-axis three times in the interval $0^\circ \leq x \leq 360^\circ$. At $x = 0^\circ$, $x = 180^\circ$, and $x = 360^\circ$, $\tan x = 0$.
